Philips
Cordless phone with answering machine

30 min answering machine

4.6cm display/ white backlight
Handset speakerphone
2 handsets

D4552B

Smart Elegance

This exquisitely designed cordless phone boasts premium detailing alongside smart functions like an answering machine, large reverse display, metal-plated keys and, of course, crystal clear sound for perfect connections everytime.

As convenient as it should be

- High contrast, 4.6cm (1.8") white on black graphical display
- Keypad backlight for fast access even in dark room
- Up to 30 minutes of messages on your answering machine
- Two-field entries for assigning 2 numbers to one contact
- Privacy settings: call block, silence mode, call barring
- Family Notes records audio messages for loved ones
- Up to 16 hours of talk time on a single charge
- Caller ID – so you always know who is calling*

Exceptional sound

- HQ-Sound: high quality acoustic engineering for superb sound
- MySound profiles to match your sound preference
- Freestanding handset with a speaker for easy handsfree calls

Eco-conscious product

- Low radiation and power consumption

Highlights

4.6cm (1.8") graphical display

High contrast, 4.6cm (1.8") white on black graphical display

Caller ID*

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

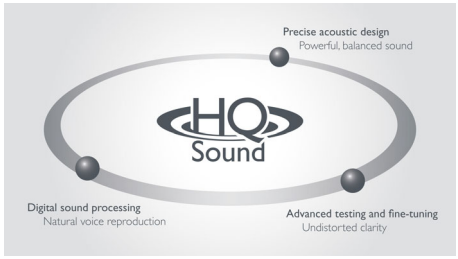
Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

HQ-Sound



Philips cordless phones with HQ-Sound: build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything – high quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

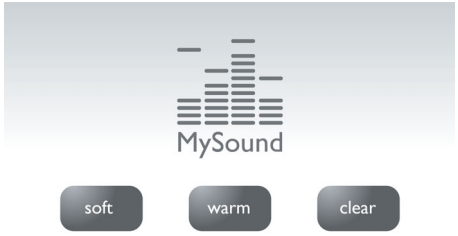
Keypad backlight

The soft amber backlight makes keys easy to read in low light conditions and at night.

Multiple privacy settings

Black list restricts receiving calls from specific numbers or starting with certain digits, keeping you away from unwanted calls. You can block 4 sets of numbers. Each set of numbers can consist between 1 to 24 digits. When there is an incoming call that starts with one of these numbers or being one of 4 exact Caller numbers, the phone will not ring. With silence mode you can disable the ringtones for specific times to enjoy peace and silence. Thanks to Call barring you can avoid expensive phone bill surprises by blocking calls to specific numbers starting with certain digits.

MySound profiles



Sound perception is subjective, and everyone has their own listening preference. MySound brings personality back to every conversation by allowing you to choose the audio profile that best matches your sound preferences: Clear – to make voices sound crisper and clearer; Soft – for friendly, softer tones; Warm – to make voices sound welcoming and warm.
